I'm going to visit a conference in Baltimore May 16-20. (Stouffer Harborplace
Hotel). As an active radioamateur I would very much appreciate to get in
contact with some local hams from in Baltimore or to get some information
regarding good shops for radio equipment.
I have no permit or rig to operate on 2 meter over there so please reply on

Howdy...

I've just aquired a PRC-47 military radio set and was wondering if anyone out there in net-kingdom might have any helpful hints or any other info about this set...personal experiences and advice would be really nice.....

I've also been told that there is a mechanical filter available for this set to allow LSB transmission...if anyone knows of the source for these (I was told they were about \$25.00 USD...), please let me know that as well.....

For those that do not know what this radio is, it is a fairly large, cumbersomb, manpack (45#?!), military field radio. It covers 2-11.999 MHz and has cw/fsk and USB capability (no lsb...the military doesn't like to put lsb on most all their radios.....regardless of frequency.....) It was primarily intended for mobile or portable use...

Please e-mail responses as I don't always seem to get all the news that goes through the net.....

Thanks in advance! 73!
